■ Customer Advisory - Russia Situation Updated Apr/15/2022

15 April, 2022

Dear Customers,

Further with our customer advisory of 2nd March, 2022, Yang Ming is continuously working on different approaches and doing our utmost to resolve cargo/shipments that were already enroute to St. Petersburg. Considering the growing economic sanctions, we regret to inform you IE7 service has been immediately suspended.

In view of unpredictable economic sanctions and operational impacts, we are currently not able to inform you when the service will be fully restored. In case your cargo/shipments were already enroute to St. Petersburg, we will try our best to help you arrange COD to other destination or return cargo back to original port of loading as long as no issue to clear custom. We will speed up the process and offer discount on free time or COD charges involved.

Kindly contact your local sales representatives to discuss and confirm your options for your impacted cargo/shipments.

Thank you & best regards

Yang Ming Marine Transport Corporation
